

# Shape Matching Game

## Soaring Balloons Shape Matching

### Items used for this project:

Clouds Scalloped Border  
([CD-108135](#))

Hot Air Balloons Cut-Outs  
([CD-120077](#))

Construction Paper

Glue

Marker

Poster board (optional)

### Directions:

Create a matching game using matching borders and cut-outs! We used our scalloped cloud border and hot air balloon cut-outs.

Measure two equal pieces of border. Glue these two pieces together along the bottom and side edges of a piece of border, but **not** the top. The top will become a pocket to slide the hot air balloons into.

Write a shape word on each hot air balloon (ex. triangle, square, etc.). Cut the coordinating shapes to the written words out of the construction paper. Glue the shapes onto the front border far enough apart that the hot air balloons will fit next to one another.

Have students match the correct balloon to its shape in the clouds.
